# □□ Setup and Layout

## Which themes are available?

123ventes does not lock you into a fixed template: you build your theme from several building blocks that you combine freely.

## The building blocks of your theme

- **The site collection**: several complete versions of your shop, to activate as you need;
- **4 layouts**: category menu on the left, inside the drop-down menu or horizontal, with advertising on the right or at the bottom;
- **7 home page templates**: product shelves, custom page, categories as blocks, categories as thumbnails, carousel, images as thumbnails, video;
- **an image library** sorted by category, for your banners and backgrounds;
- **colour themes**: the colours change everywhere at once, and you can fine-tune each element.

Every shop adapts automatically to phones and tablets.
