□□ Security and Maintenance

How do I update my site safely?

You have nothing to do. 123ventes regularly updates your site, both the code and the server.

- **New features**: they arrive in your back office without reinstalling anything;
- **security fixes**: applied as soon as they are available;
- **information**: you can receive an email with each new version.

Your version is shown at all times in the “My account” menu.

Your own changes

For your design, catalogue or text changes, work on your test site, check the result, then publish: your online shop only changes when you publish.
