□□ Test and Production Environments

How do I test features before publishing them?

The back office works on the test environment: you can try everything without your customers seeing it.

What to test?

- **The order journey**: basket, delivery, payment (in test mode, no money is taken), confirmation;
- **the emails** sent to your customers;
- **your business rules**: discounts, free delivery, free product;
- **your design**, on computer and on phone;
- **your texts** in each language.

Next

Once you are happy, publish to the production environment. Before opening, you can delete your test orders in the “Maintenance” menu, “Purges” tab.
