# Design and Customisation

## How do I change colours and fonts?

123ventes gives you three ways to change colours and fonts, from the simplest to the most precise.

## 1. The theme colours

They change the colours of text and backgrounds in one go, by page type. This is the quickest way to change the look and feel of your shop.

## 2. From the active site

Click an element of your shop: you go straight to its style sheet.

## 3. The “Styles” menu

For fine-tuning, object by object. The tabs cover display, position, spacing, size, borders, background colour, text, font, background image and animation.

## Tips

- Stick to two fonts: one for headings, one for body text;
- keep good contrast between text and background, for readability.
