Catalogue Management

Which image formats can I use for my products?

For your products, 123ventes accepts **JPEG**, **PNG**, **SVG** and **BMP** formats, up to 5 MB per image.

WebP

The WebP format cannot be uploaded yet. Save your images as JPEG (photos) or PNG (logos, transparent backgrounds): they are resized automatically.

SVG

SVG images are accepted in the catalogue and for the design. For your security, they are cleaned on upload (scripts are removed). They are not resized: there is no need, as an SVG image stays sharp at any size.

Automatic resizing

- product images: 1,200 pixels wide at most;
- banners: 1,920 pixels;
- logo: 300 pixels.

An image is never enlarged and its proportions are kept.
