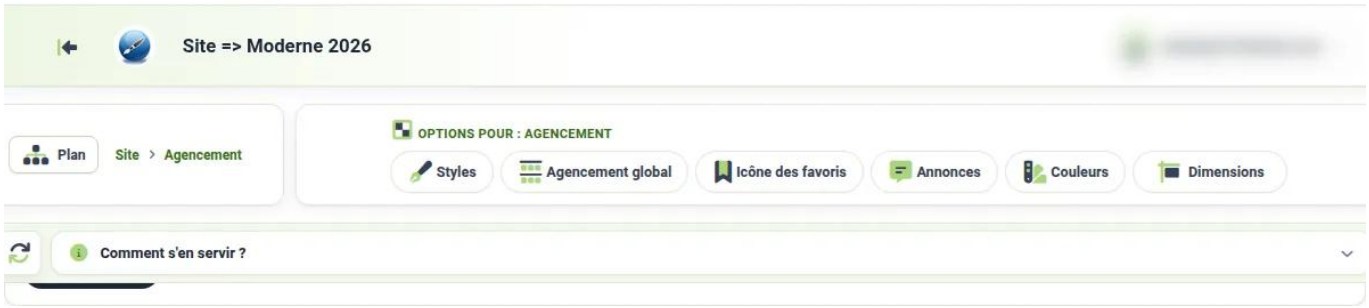
Design and Customisation

Does my shop display well on mobile?

Yes. Every 123ventes shop is **responsive**: its display adapts automatically to the screen size, on phone, tablet and computer. You have nothing to set up.



On a phone

- the menus are grouped into a mobile menu;
- images and columns adjust to the width of the screen;
- the basket and checkout remain easy to use with a finger.

Our tips

- Check your shop on your own phone before publishing;
- prefer short texts in banners and carousels;
- lighten your images: mobile connections are often slower.

More than half of online purchases are made on mobile, and Google takes mobile display into account for search ranking.
