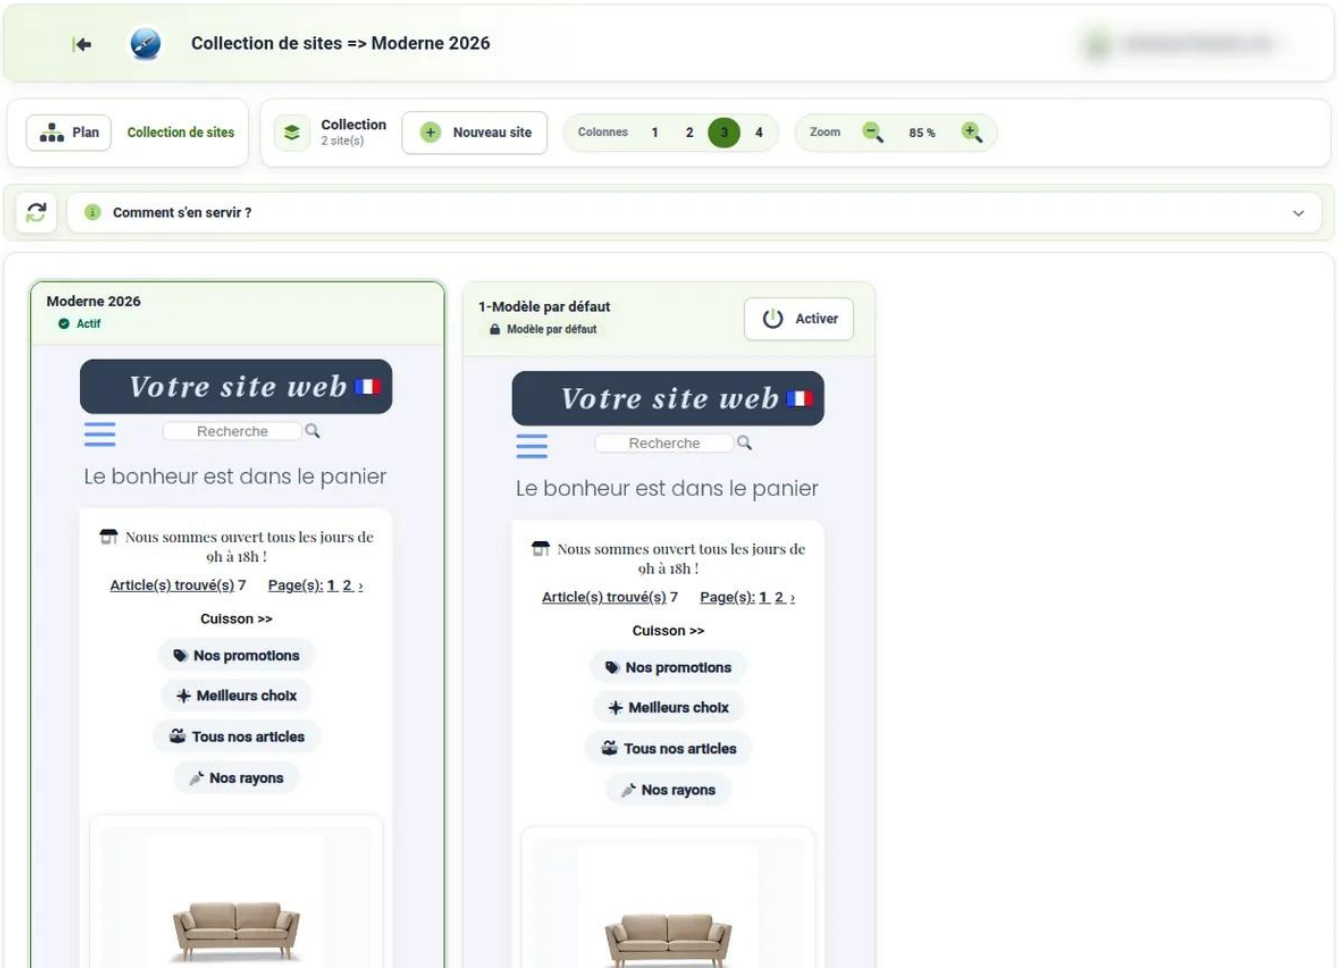
Design and Customisation

How many themes can I create for my site?

You can create as many themes as you like for each site in your collection, and you have access to a whole library of images.



What you can change in a theme

- every element of the site: title, logo, favicon, banners;
- the colours of text and backgrounds, page by page;
- the home page and its template;
- the layout of the menus and advertising.

How to do it

1. Open the “Layout” menu, “Site collection” tab;
2. click “New site”: a copy of the active site is created;
3. change it as you wish, then click “Activate” when it is ready.

Your catalogue and your orders do not change: only the presentation is different.
