Site Collection

How do I manage several shops from a single interface?

With 123ventes, you manage a single product catalogue, but you can present several versions of it thanks to the site collection.

A single back office for

- **several presentations** of your shop: themes, layouts, home pages;
- **several languages**: French, English, German, Spanish and Italian, with images adapted to each language;
- **a single catalogue, a single stock and a single customer list**: no need to enter anything twice.

You switch from one presentation to another in a single click, without touching your products or your orders.
