How do I accept card payments?

Card payments go through **Stripe**. You can also offer **PayPal**.

Setting it up

1. Create your account with Stripe (or PayPal);
2. in the “Options” menu, “Payment methods” tab, activate Stripe and click “Configure”;
3. enter your “Test” and “Production” keys, provided by Stripe;
4. place an order on your test site: no money is taken;
5. publish your options.

Security

Card details are entered on Stripe: they never pass through your shop. The payment is checked when the customer returns, then the invoice is created and sent automatically.

Fees

123ventes takes no commission: only the Stripe or PayPal fees apply. Bank transfer and cheque remain available, free of charge.
