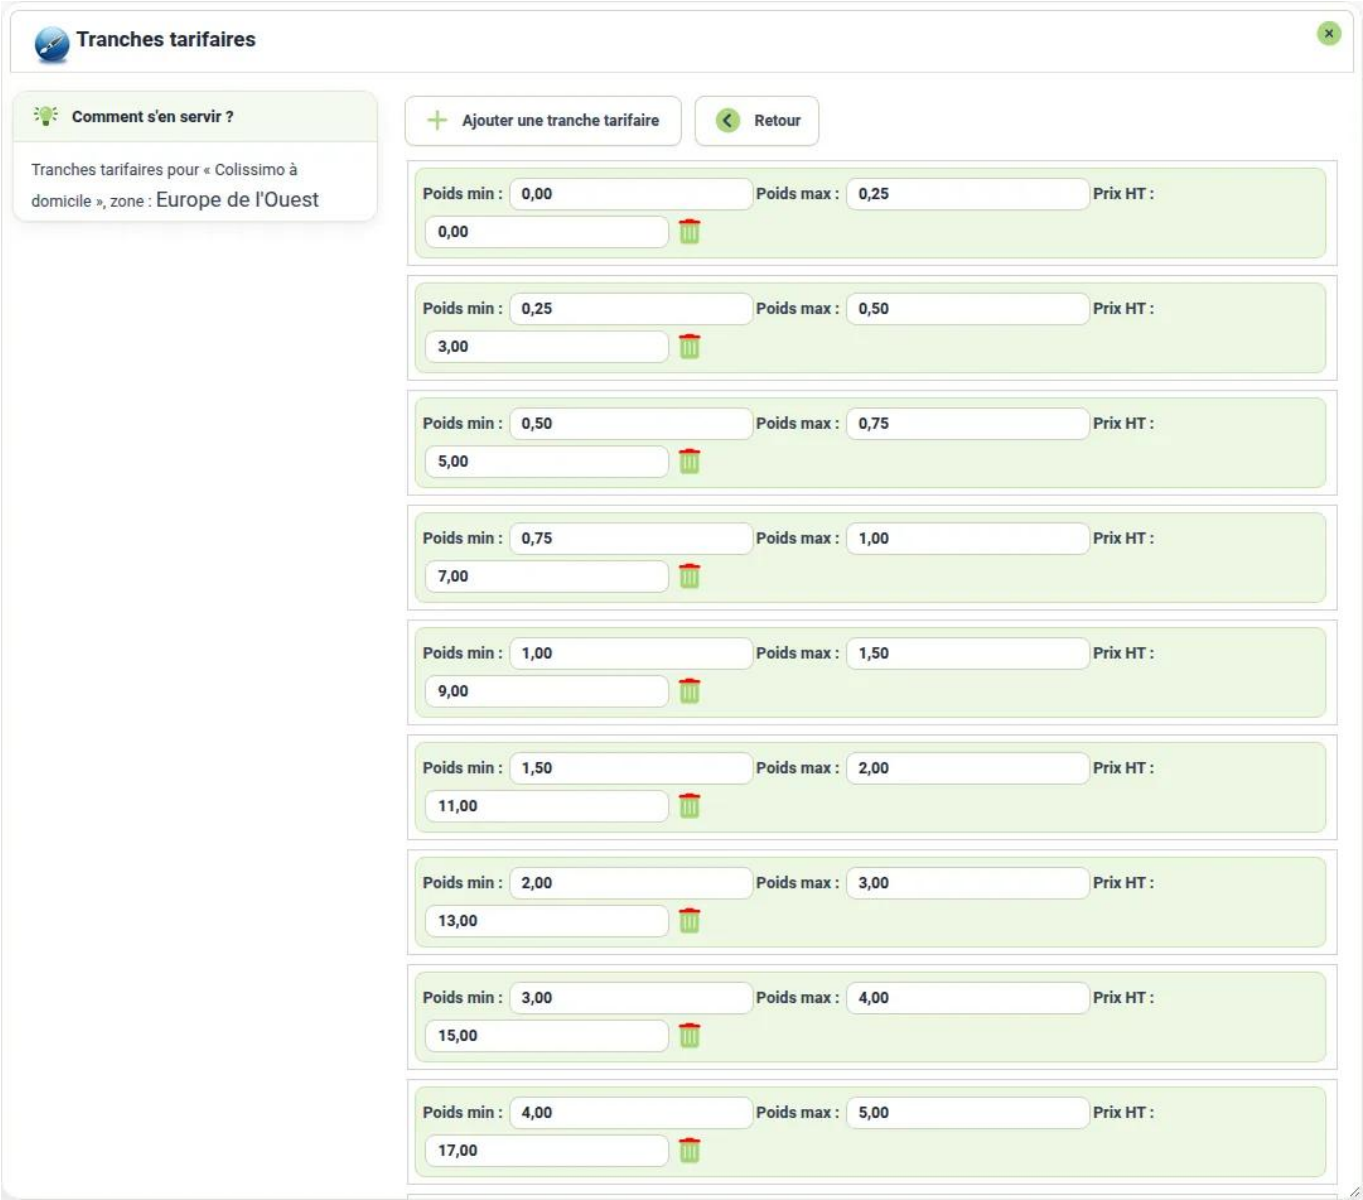
□□ Delivery Management

How do I manage shipping costs?

Shipping costs depend on distance, weight, transit time and the type of packaging. You set them in the “Options” menu, “Delivery methods” tab, “Configure” button: define a rate for each zone and each weight band.



How the price is calculated

1. The weight of the order is the sum of the weights of the products: make sure you enter the weight of each product;
2. the zone depends on your customer’s delivery country;
3. the rate for the matching weight band is shown in the basket.

Offering free delivery

In the “Orders” menu, rules engine: combine the “Order amount” condition with the “Free delivery” benefit. For example: free delivery on orders of 50 € or more.

In-store collection is always free of charge.
